ARYAN MOT

DATA & AI PROFESSIONAL | PYTHON | SQL | BUSINESS INTELLIGENCE | MACHINE LEARNING | GENERATIVE AI

Jaipur, India | +91 8209740384 | aryanmot288@gmail.com | linkedin.com/in/aryanmot2001

PROFESSIONAL SUMMARY

Data and AI professional with hands-on experience building Python/SQL analytics workflows, BI dashboards, data pipelines, machine learning models, and applied GenAI systems. Strong in EDA, ETL, forecasting, anomaly detection, model evaluation, RAG, semantic search, and API-based applications. Experienced in translating business questions into reliable data-driven insights, automating workflows, and developing end-to-end analytical solutions using modern data and AI tools.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, OOP, Pandas, NumPy, EDA, Data Cleaning, Data Transformation, Feature Engineering, Statistical Analysis

Business Intelligence & Visualization: Power BI, Tableau, Matplotlib, KPI Reporting, Dashboarding, Data Storytelling, Business & Product Analytics

Machine Learning & Statistics: Scikit-learn, XGBoost, Regression, Classification, Clustering, Forecasting, Anomaly Detection, Hypothesis Testing, Cross-Validation, SHAP, Model Evaluation

Generative AI & NLP: LLM Integration, RAG, Prompt Engineering, OpenAI Embeddings, Sentence Transformers, Semantic Search, Vector Databases, PostgreSQL/pgvector, FAISS, Chroma

Data Engineering & Databases: PostgreSQL, MySQL, ETL/ELT, PySpark, Apache Spark, Apache Airflow, Apache Kafka, Data Pipelines, Data Validation, Batch Processing

Backend, **Deployment & Tools:** FastAPI, REST APIs, API Integration, Streamlit, Git, GitHub, Docker, Linux/Unix, Jupyter, GCP Basics

KEY PROJECTS

Sentinel - Business Research & Decision Intelligence System

• Built an end-to-end decision-intelligence platform using Python, SQL, statistical analysis, machine learning, anomaly detection, forecasting, and business analytics for revenue, churn, support, and infrastructure-cost investigation.

• Developed controlled LangGraph and RAG workflows with pgvector retrieval, evidence validation, citation-backed reporting, and Streamlit delivery achieved 167 passing offline tests and 82%+ branch-aware coverage for reliable, auditable analytical outputs.

• Designed a Data Science–first architecture where LLMs handle question understanding and explanation while validated SQL, Python, statistical, and ML pipelines generate numerical results, reducing hallucination risk and ensuring traceable, evidence-backed decisions.

Customer Churn Risk Scoring App with SHAP Explainability

- Built and deployed a churn prediction app to estimate customer risk from inputs performed cleaning, feature engineering, model comparison, and evaluation using 80% test accuracy.
- Added SHAP explainability to surface customer-level churn drivers and translate predictions/ into retention-focused business insights.

AI Resume Screener & Job Match Ranker

- Built a Streamlit AI screener to compare resumes with job descriptions using PDF parsing, embeddings, cosine similarity, keyword extraction, and missing keyword highlighting.
- Designed recruiter-style outputs showing match percentage, extracted skills, missing keywords, and candidate-job fit ranking.

PROFESSIONAL EXPERIENCE

Python Developer | Zucol Group of Services, Jaipur **May 2024 - Dec 2024**

- Automated repetitive data workflows using Python scripts, reducing manual processing time for internal operations.
- Built SQL transformation and validation pipelines (joins, aggregations, rule-based checks) to improve structured data accuracy.
- Supported data extraction, transformation, and migration tasks debugged Python scripts and documented process-level fixes.

Technical Research Analyst | Intellipaat, Bengaluru **Mar 2023 - Apr 2024**

- Analysed learner behaviour datasets using Python (Pandas, Matplotlib) to identify engagement patterns and course demand trends.
- Built ML/forecasting models to predict learner interest across technical course categories performed EDA and feature engineering.
- Developed Power BI dashboards on SQL-prepared datasets, visualizing inquiry patterns, category performance, and KPIs.

EDUCATION

Master of Computer Applications (Data Science) | Lovely Professional University **July 2021 - June 2023**

Bachelor of Computer Applications | Shri Madhav College, MDSU **Aug 2018 - April 2021**

CERTIFICATIONS

Agentic AI Fundamentals — Government Certification

IBM Data Science Specialization
